

## CHAMPIONS HOW TO FIND THEM

# Most important skills for top players

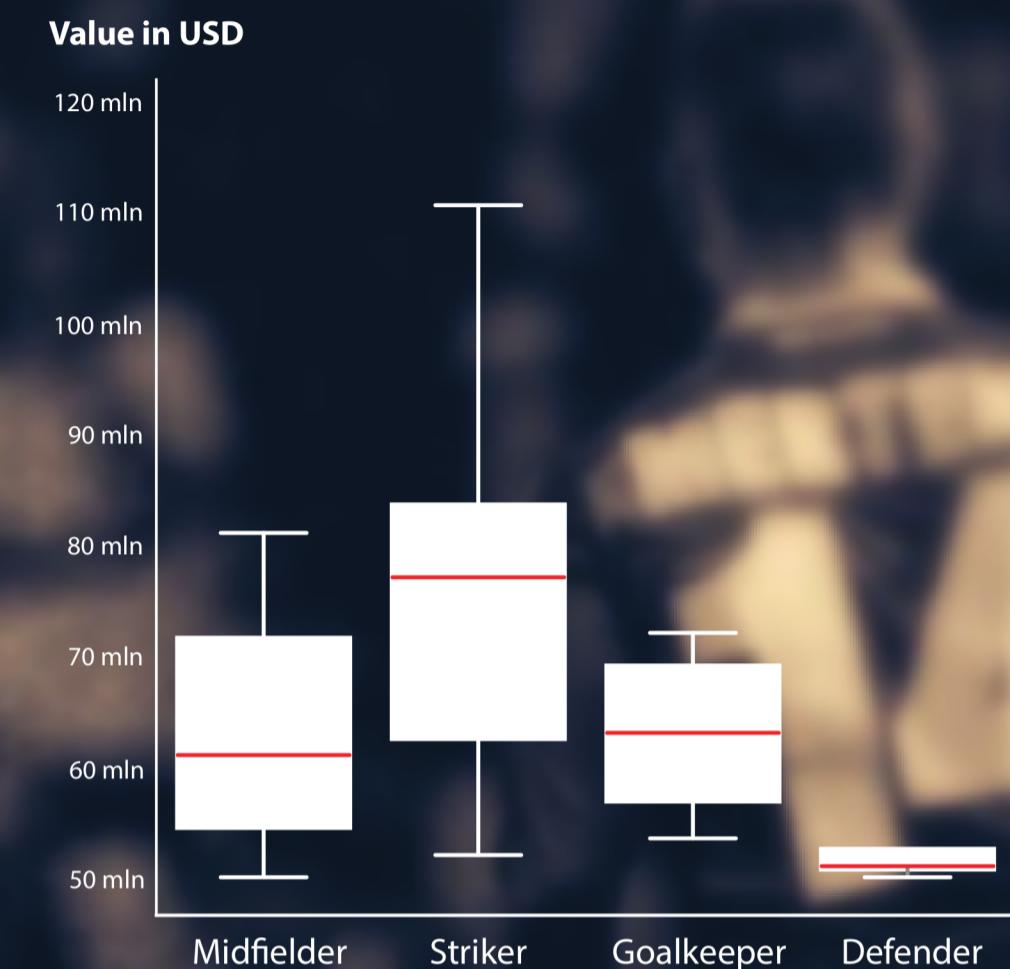

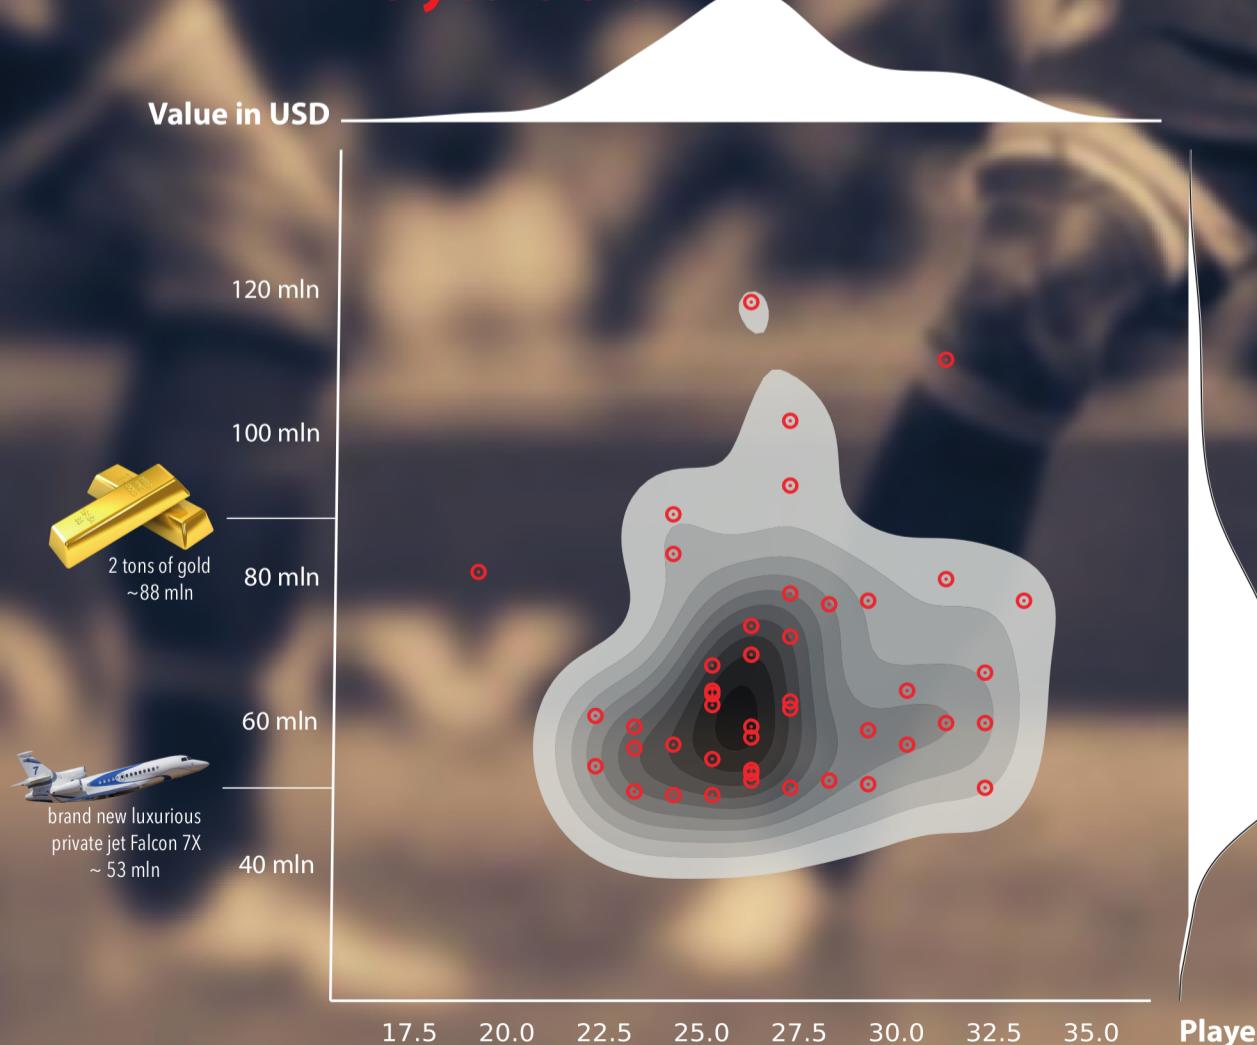

If You find yourself looking at player with superhuman **reactions**,  
fantastic **ball control** and great **dribbling**, hesitate no more and buy buy buy!  
Our model\* shows that these are the most important skills that all football superstars have.

\* Scikit-learn default Random Forest implementation with imblearn oversampling, achieving 100% accuracy on training data.  
Values of feature importances calculated accordingly

## Youth comes but once in a lifetime

With only selected few superstars over 30 years, we highly recommend investing in youth, with sweet spot being  
**26 years old**

## Position

People love goalscorers and money follows love. **Strikers** and **midfielders** make up 83% of players worth more than 50 mln €, and they have the biggest median value. On the opposite spectrum, defenders, the least sexy position on the pitch, are valued significantly less

## Geography

There are only two places with abundance of really valuable players: **Europe** and **South America**, with Old Continent importing all the best players in the world - 100% of them play in Europe. Top 5 leagues: Spain, England, Germany, France and Italy
